A rectangular grid consisting of 20 rows and 10 columns. The rows alternate between being solid yellow and white. Specifically, the 1st, 3rd, 5th, 7th, 9th, 11th, 13th, 15th, 17th, and 19th rows are yellow. The 2nd, 4th, 6th, 8th, 10th, 12th, 14th, 16th, 18th, and 20th rows are white. All grid lines are black.

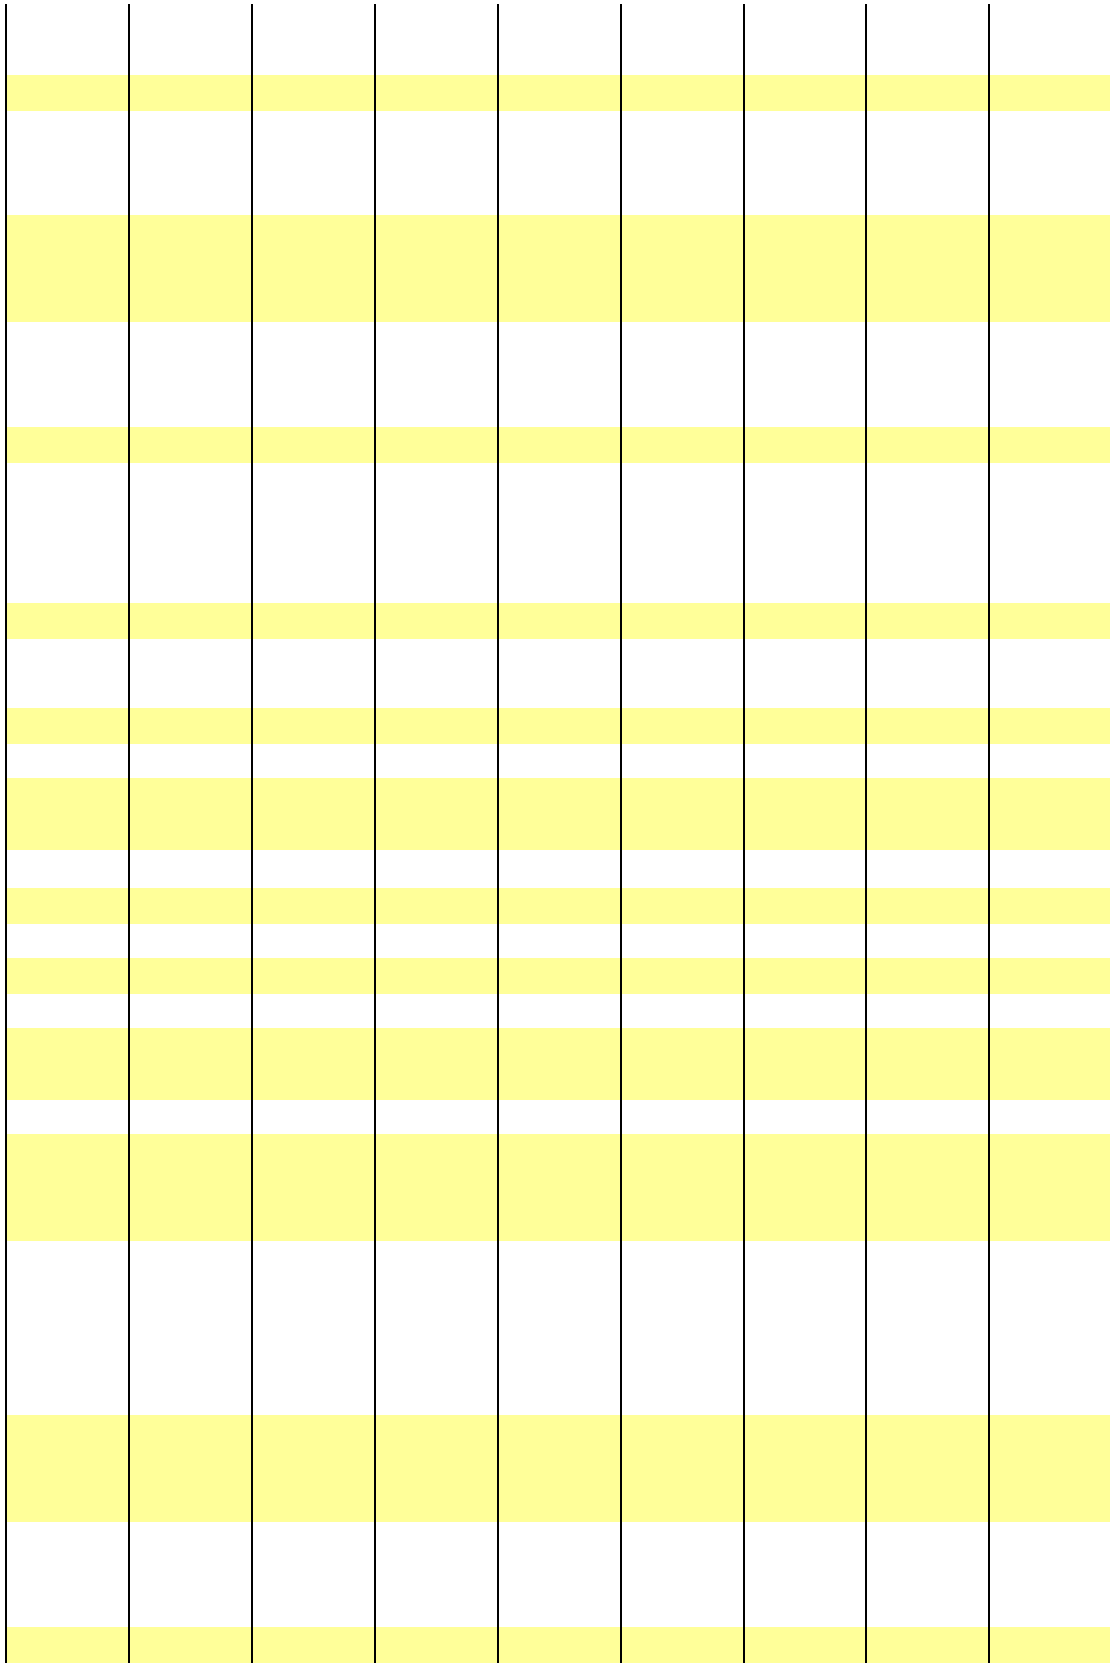

A grid structure consisting of 9 columns and 25 rows. The rows are filled with alternating horizontal bands of light yellow and white, starting with a light yellow band in the top row. The vertical lines of the grid are black and extend across all rows.

The image shows a 9x9 grid of cells. The cells are arranged in a checkerboard pattern where every other row is shaded yellow, starting from the top row. The grid is composed of 9 columns and 9 rows. The shading pattern is as follows: Row 1 (Yellow), Row 2 (White), Row 3 (Yellow), Row 4 (White), Row 5 (Yellow), Row 6 (White), Row 7 (Yellow), Row 8 (White), Row 9 (Yellow).

A grid consisting of 9 columns and 25 rows. The cells are colored in an alternating pattern of yellow and white. The top row (row 1) is entirely yellow. The second row (row 2) has white cells in the first, third, fifth, seventh, and ninth columns, and yellow cells in the second, fourth, sixth, and eighth columns. This alternating pattern continues for the remaining rows. The bottom row (row 25) is entirely yellow.

A 9x10 grid of alternating yellow and white cells. The grid is composed of 9 rows and 10 columns. The cells are arranged in a checkerboard pattern, starting with a yellow cell in the top-left corner (row 1, column 1). The grid is defined by black lines that form the boundaries of each cell.

White	Yellow	White	Yellow	White	Yellow	White	Yellow	White

A 10x10 grid with alternating yellow and white cells in a checkerboard pattern. The grid is defined by thin black lines. The cells are arranged in 10 columns and 10 rows. The color of each cell is determined by its position: cells where both the row and column indices are even (starting from 0) are yellow, and all other cells are white.

White	Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow

The image displays a grid of 20 rows and 10 columns. Each cell in the grid is filled with either a solid yellow color or is left white, creating a checkerboard pattern. The grid is defined by thin black lines on the top, bottom, left, and right edges, and by vertical lines separating the columns and horizontal lines separating the rows. The yellow and white cells alternate in a regular, repeating pattern across the entire grid.

The image displays a grid of 18 rows and 9 columns. The cells in the grid alternate in color in a checkerboard pattern. The top-left cell (row 1, column 1) is yellow. The cells in the first row are yellow, white, yellow, white, yellow, white, yellow, white, yellow. The cells in the second row are white, yellow, white, yellow, white, yellow, white, yellow, white. This pattern continues for all 18 rows. The grid is bounded by a thin black line on the left and right sides, and a thin black line at the bottom. There are no labels or text within the grid.

White	Yellow	White	Yellow	White	Yellow	White	Yellow	White

A grid consisting of 9 columns and 14 rows. The top row (row 1) and the bottom row (row 14) are highlighted in yellow. All other rows are white. The grid is formed by black lines.

A 10x10 grid with alternating yellow and white cells in a checkerboard pattern. The grid is composed of 10 columns and 10 rows. The cells are arranged as follows:

Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow	White
White	Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow
Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow	White
White	Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow
Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow	White
White	Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow
Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow	White
White	Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow
Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow	White
White	Yellow	White	Yellow	White	Yellow	White	Yellow	White	Yellow

The image shows a rectangular grid with 9 vertical columns and 25 horizontal rows. The rows alternate between being entirely yellow and entirely white, starting and ending with a yellow row. All grid cells are empty. The grid is defined by thin black lines, with a double-line border at the top and bottom.

This image shows a grid of 12 rows and 9 columns. Each of the 108 cells in the grid is filled with a solid yellow color and is outlined by a thin black border. The grid is positioned centrally on a plain white background.

The image displays a grid of 10 columns and 13 rows. The cells are colored in an alternating pattern of yellow and white. The top-left cell (row 1, column 1) is yellow. The pattern alternates by row and column: yellow cells are located at (row, column) where both row and column indices are odd (1, 1), (1, 3), (1, 5), (1, 7), (1, 9) for the first row, and (2, 2), (2, 4), (2, 6), (2, 8), (2, 10) for the second row. This pattern repeats throughout the grid, resulting in 55 yellow cells and 35 white cells.

The image displays a grid structure with 9 columns and 20 rows. Each cell in the grid is filled with either a solid yellow color or is white. The cells are arranged in an alternating checkerboard pattern. The top-left cell (row 1, column 1) is yellow. The cells in the first row are yellow in columns 1, 3, 5, 7, and 9, and white in columns 2, 4, 6, and 8. This alternating pattern continues for all 20 rows. The grid is bounded by thin black lines on the top, bottom, and sides.
