A grid of 9 columns and 19 rows. The grid is filled with alternating horizontal stripes of yellow and white. The stripes start with a yellow stripe at the top, followed by a white stripe, and continue in this pattern down to the bottom. All cells in the grid are empty.

A grid of 20 rows and 10 columns. The cells in the grid alternate between yellow and white in a checkerboard pattern. The top-left cell (row 1, column 1) is yellow. The grid consists of 10 columns and 20 rows, with each cell being either yellow or white, alternating in a checkerboard pattern.

The image displays a grid with 9 columns and 16 rows. The grid is defined by vertical black lines. The cells are filled with a repeating pattern of yellow and white. The yellow cells are located at the intersections of the 1st, 3rd, 5th, 7th, and 9th columns with the 1st, 3rd, 5th, 7th, 9th, 11th, 13th, and 15th rows. The white cells are located at the intersections of the 2nd, 4th, 6th, and 8th columns with the 1st, 3rd, 5th, 7th, 9th, 11th, 13th, and 15th rows. The 1st, 3rd, 5th, 7th, and 9th rows are entirely white.

A 12x9 grid of yellow and white alternating cells. The grid is composed of 12 rows and 9 columns. The cells are arranged in a checkerboard pattern, with yellow cells in the top-left and bottom-right corners of each 2x2 sub-grid, and white cells in the top-right and bottom-left corners. The grid is outlined with thin black lines.

The image displays a grid structure consisting of 9 columns and 20 rows. The rows are color-coded in an alternating pattern: the 1st, 3rd, 5th, 7th, 9th, 11th, 13th, 15th, 17th, 19th, and 20th rows are highlighted in yellow, while the 2nd, 4th, 6th, 8th, 10th, 12th, 14th, 16th, and 18th rows are white. All 20 rows are enclosed within a black border. The grid is empty, with no text or data present within the cells.

A grid table with 9 columns and 20 rows. The cells are colored in a checkerboard pattern: yellow for the cells where the sum of the row and column indices is even, and white for the cells where the sum is odd. The grid is defined by 10 vertical lines and 21 horizontal lines.

A grid with 25 rows and 9 columns. The cells are filled with a repeating pattern of yellow and white colors, alternating by row and column. The first row has a yellow cell in column 1 and a white cell in column 2. The second row has a white cell in column 1 and a yellow cell in column 2. This pattern continues for all 25 rows and 9 columns.

The image shows a vertical rectangular grid with 9 columns and 12 rows. The rows are color-alternating: the first, third, fifth, seventh, ninth, and eleventh rows are filled with a light yellow color, while the second, fourth, sixth, eighth, and tenth rows are white. All grid cells are empty. The grid is bounded by thin black lines.

The image displays a grid structure with 10 vertical columns and 20 horizontal rows. The grid is composed of alternating horizontal bands of yellow and white, starting with a yellow band at the top. The vertical lines are black and evenly spaced, creating a grid of 9 columns and 19 rows of white cells. The yellow bands are thin and span the entire width of the grid. The overall appearance is that of a stylized, high-contrast grid or pattern.

A 10x10 grid of cells. The cells are colored in a checkerboard pattern of yellow and white. The top-left cell (row 1, column 1) is yellow. The grid consists of 10 rows and 10 columns.

This image shows a grid with 9 columns and 20 rows. The grid is filled with a repeating pattern of yellow and white cells. The cells in the first, third, fifth, seventh, and ninth columns are yellow, while the cells in the second, fourth, sixth, eighth, and tenth columns are white. This creates a vertical checkerboard effect across the entire grid.

A grid consisting of 9 columns and 18 rows. The grid is defined by vertical black lines separating the columns and horizontal black lines separating the rows. The cells in the grid are colored in a repeating pattern of yellow and white horizontal bands. Specifically, the 1st, 3rd, 5th, 7th, 9th, 11th, 13th, 15th, 17th, and 18th rows are shaded yellow. The 2nd, 4th, 6th, 8th, 10th, 12th, 14th, and 16th rows are white. The 9th column is highlighted in yellow, and the 11th row is highlighted in white.

The image displays a grid structure consisting of 9 columns and 14 rows. The rows are colored in an alternating pattern, starting and ending with a yellow row. Specifically, the 1st, 3rd, 5th, 7th, 9th, 11th, 13th, and 14th rows are yellow, while the 2nd, 4th, 6th, 8th, 10th, 12th, and 13th rows are white. This results in a total of 8 yellow rows and 6 white rows. The grid is bounded by thin black lines.

The image shows a grid with 18 rows and 9 columns. The cells in the grid alternate in a checkerboard pattern between yellow and white. The top-left cell (row 1, column 1) is yellow. This means that all cells where both the row and column indices are odd (e.g., (1,1), (1,3), (3,1), (3,3)) are yellow, while all cells where either the row or column index is even (e.g., (1,2), (2,1), (2,2)) are white. This pattern repeats throughout the entire grid.
